B Uday Kumar Entry-Level DevOps & Cloud Engineer

+91 8125261689 | udaybijinepalli@gmail.com | www.linkedin.com/in/udaybiji/ | udaykumarbijinepalli.github.io

PROFESSIONAL SUMMARY

Entry-level DevOps and Cloud Engineer with internship and project experience in CI/CD automation, containerization, cloud infrastructure provisioning, and Kubernetes deployments. Hands-on experience building Jenkins and GitHub Actions workflows, deploying applications using Docker and AWS EKS, and provisioning AWS infrastructure with Terraform. Skilled in Linux, Python, Bash, AWS, Docker, Kubernetes, Jenkins, Terraform, and monitoring tools including Prometheus and Grafana.

TECHNICAL SKILLS

Languages:
Python, Java, C, Bash
Cloud Platforms:
AWS (EC2, S3, IAM, VPC, EBS, RDS, CloudWatch, Auto Scaling, Elastic Load Balancer)
Microsoft Azure (VMs, Blob Storage, VNet, Azure SQL, Azure Monitor, VM Scale Sets, Load Balancer)
DevOps & CI/CD Tools:
Git, GitHub Actions, Docker, Jenkins, Ansible, Terraform, Kubernetes, Prometheus, Grafana
Databases/Operating Systems:
MySQL, Linux

WORK EXPERIENCE

DevOps Intern **November 2025 – Present**
KODS Technologies Bengaluru

- Build and maintain CI/CD pipelines using Jenkins and Git to automate application build and software delivery workflows.
- Containerize applications using Docker and support deployment across Linux environments.
- Provision cloud infrastructure using Terraform and automate system administration tasks using Bash scripting.
- Collaborate on deploying applications across AWS and Azure environments using DevOps practices.

CloudOps Intern **February 2025 – August 2025**
Visionet Systems Bengaluru

- Gained exposure to enterprise CloudOps practices, cloud infrastructure architecture, and software delivery workflows.
- Studied AWS and Microsoft Azure services, deployment models, and enterprise cloud service competencies.
- Explored ITIL-aligned operational processes and responsibilities within enterprise cloud environments.

EDUCATION

Bachelor of Engineering – Information Science and Engineering **2021-25**
New Horizon College of Engineering | CGPA: **8.35 / 10** Bengaluru, Karnataka

TECHNICAL PROJECTS

Cloud-Native CI/CD Pipeline for Automated Application Deployment
Git, GitHub, Jenkins, Docker, Docker Hub, AWS EC2, Linux

- Designed and implemented an automated CI/CD pipeline integrating GitHub, Jenkins, Docker, and AWS EC2 to streamline application deployment.
- Automated Docker image build, versioning, and deployment through Jenkins Pipelines, reducing manual deployment effort.
- Deployed and validated containerized applications on Linux-based AWS EC2 instances following DevOps best practices.

Cloud-Native Microservices Deployment on AWS EKS
Terraform, AWS, Kubernetes, Helm, NGINX Ingress, GitHub Actions, Prometheus, Grafana

- Provisioned AWS networking and an EKS managed node group using Terraform; deployed a polyglot microservices application using Helm and NGINX Ingress.
- Integrated GitHub Actions deployment workflows with Prometheus and Grafana monitoring; investigated pod-scheduling failures by tuning Prometheus CPU resource requests.

Infrastructure Provisioning using Terraform
Terraform, AWS, EC2, IAM, VPC, S3

- Provisioned AWS compute, networking, identity and storage resources using Terraform, applying Infrastructure as Code principles to enable repeatable infrastructure deployments

Docker Persistent Storage & MongoDB Backup/Restore Lab
AWS EC2, Ubuntu, Docker Compose, MongoDB, Docker Volumes

- Deployed a Node.js application with MongoDB using Docker Compose, configuring a persistent named volume for live database files and a separate volume for backup archives.
- Verified database persistence across container recreation and performed MongoDB archive backup and restoration using mongodump and mongorestore.

Diabetes Prediction Web Application Using SVM Classifier
Python, Flask, Machine Learning, SVM, HTML/CSS, AWS EC2, Amazon RDS

- Developed a machine learning-based web application using a Support Vector Machine (SVM) classifier to predict diabetes risk based on user-provided healthcare parameters.
- Deployed the Flask-based application on AWS EC2 with Amazon RDS integration, enabling users to submit health-related inputs and receive diabetes prediction results through a web interface.

CERTIFICATIONS

- Microsoft Certified: Azure Fundamentals (AZ-900)
- Oracle Cloud Infrastructure Foundations Associate
- HCL Software – Cybersecurity Training & Certification
- Infosys Springboard – Machine Learning Implementation
