

B UDAY KUMAR

Software Engineer | Cloud | DevOps

+91 8125261689 | udaybijinepalli@gmail.com | <https://www.linkedin.com/in/udaybiji/>

PROFESSIONAL SUMMARY

Entry-level Software Engineer with hands-on experience in cloud infrastructure, DevOps automation, and application deployment through internships and personal projects. Proficient in Python, AWS, Linux, Docker, Jenkins, Kubernetes, Terraform, and Ansible, with a passion in building cloud-native software and infrastructure automation.

EDUCATION

Bachelor of Engineering – Information Science and Engineering

2021-25

New Horizon College of Engineering | CGPA: **8.35 / 10**

Bengaluru, Karnataka

TECHNICAL SKILLS

Languages:

Python, Java, C, Bash

Cloud Platforms:

AWS (EC2, S3, IAM, VPC, EBS, RDS, CloudWatch, Auto Scaling, Elastic Load Balancer)

Microsoft Azure (VMs, Blob Storage, VNet, Azure SQL, Azure Monitor, VM Scale Sets, Load Balancer)

DevOps & CI/CD Tools:

Git, GitHub Actions, Docker, Jenkins, Ansible, Terraform, Kubernetes

Databases/Operating Systems:

MySQL, Linux

WORK EXPERIENCE

DevOps Intern

November 2025 – Present

KODS Technologies

Bengaluru

- Built and maintained CI/CD pipelines using Jenkins and Git to automate software delivery workflows.
- Containerized applications using Docker and supported deployment across Linux environments.
- Provisioned cloud infrastructure using Terraform while automating system administration tasks through shell scripting.
- Collaborated on deploying applications using AWS microservices following DevOps practices.

CloudOps Intern

February 2025 – August 2025

Visionet Systems

Bengaluru

- Worked alongside cloud operations teams to understand enterprise cloud infrastructure, and software delivery practices.
- Explored AWS and Microsoft Azure services, cloud architecture, and service competency models to build a strong foundation in cloud technologies.
- Assisted in understanding cloud infrastructure components, deployment models, ITIL and responsibilities across enterprise cloud environments.
- Built a strong foundation in CloudOps and DevOps practices, strengthening interest in cloud engineering and infrastructure automation.

Cybersecurity Intern

October 2023 – November 2023

IBM

Bengaluru

- Completed a six-week internship focused on cybersecurity principles, secure computing practices, and enterprise information security.
- Explored cyber threats, malware, attack vectors, and security best practices used to protect enterprise systems and digital assets.
- Analyzed common cybercrime scenarios and preventive security measures, developing a strong security-first approach to IT systems.
- Strengthened understanding of information security concepts applicable to secure cloud infrastructure and software development.

TECHNICAL PROJECTS

Cloud-Native CI/CD Pipeline for Automated Application Deployment

Git, GitHub, Jenkins, Docker, Docker Hub, AWS EC2, Linux

- Designed and implemented an automated CI/CD pipeline integrating GitHub, Jenkins, Docker, and AWS EC2 to streamline application deployment.
- Automated Docker image build, versioning, and deployment through Jenkins Pipelines, reducing manual deployment effort.
- Deployed and validated containerized applications on Linux-based AWS EC2 instances following DevOps best practices.

Infrastructure Provisioning using Terraform

Terraform, AWS, EC2, IAM, VPC, S3

- Provisioned AWS infrastructure using reusable Terraform modules following Infrastructure as Code (IaC) principles.
- Automated deployment of compute, networking, and identity resources through declarative infrastructure definitions.
- Ensured repeatable and reliable infrastructure deployment through Infrastructure as Code (IaC) practices.

AWS Full-Stack Web Application Deployment

Python (Flask), HTML/CSS, AWS EC2, Amazon RDS, Amazon S3

- Designed and deployed a cloud-hosted full-stack web application using Flask for the backend and HTML/CSS for the frontend.
- Hosted the application on Amazon EC2, integrated Amazon RDS for persistent database storage, and utilized Amazon S3 for static asset management.
- Demonstrated end-to-end cloud application deployment by integrating compute, storage, and database services within AWS.

CERTIFICATIONS

- Microsoft Certified: Azure Fundamentals (AZ-900)
- Oracle Cloud Infrastructure Foundations Associate
- HCL Software – Cybersecurity Training & Certification
- Infosys Springboard – Machine Learning Implementation
